

The University of Missouri Soybean Breeding Program and the Bradford Research and Extension Center in Columbia, MO presents the 2nd Annual:

'PICK YOUR BEAN' DAY

Utilizing Wild and Exotic Soybean Collections to Improve Yield Potential

Tuesday, September 9th 2014 from 8:30 am to 11:00 am

Bradford Research and Extension Center in Columbia, MO

4968 Rangeline Road | Columbia, MO 65201-8973

* FOR FARMERS

Gain 'hands on' experience and understanding of how soybean varieties grown on your farms are created

PICK YOUR BEAN!!!

* FOR STUDENTS

Learn the difference in population management for genetic mapping studies versus variety development

PICK YOUR BEAN!!!

* FOR FACULTY

Observe unique germplasm collections, populations, and plants that are available for collaborative research

PICK YOUR BEAN!!!

Following a short presentation by soybean breeder Dr. Andrew Scaboo, participants will choose and tag desirable soybean plants in the field from populations with domestic, wild, or exotic ancestry. Soybean plants selected by participants will be showcased during the 2015 'Pick Your Bean' Day as a new experimental line and the best lines will be yield tested in 2016.

Your single plant could become a new variety grown by U.S. farmers!

FREE BREAKFAST!!!

To register (**no fee required**) please email Andy Biggs at biggsa@missouri.edu by August 29th with the number of participants in your group
